- Test Case – 9 / Test Step 2; refer to the related Bug-1 reported below

Test Case-2 / Step-1 and Test Case-5/Step-1 are automatically executed and passed by Selenium / Selenium Webdriver in Java.

Compatibility Testing

- All Test Cases planned are executed and passed by Chrome browser in PC Windows 10.

Bugs

• Bug – 1

Title: Liferay Forms - unexpected Submit button applicable

Severity/Priority: High

Description

Connect to web page <https://forms.liferay.com/web/forms/shared/-/form/122548>

The Submit button is unexpectedly always applicable.

Expected behaviour:

The Submit button must be applicable only after compiling all the mandatory fields.

Environment: Chrome browser in PC Windows 10

Reproducibility: Systematic.

SW Version: x.y.z

Contact details: tester@test.com

Attachment: screenshot

The screenshot shows a web form titled "This is a Liferay Forms". Below the title is a description: "This is a description field from our Liferay Forms". The form contains three input fields: "What is your name?" (with an asterisk indicating it's required), "What is the date of your birth?" (with an asterisk and a calendar icon), and "Why did you join the testing area?" (with an asterisk). A blue "Submit" button is located at the bottom right of the form.

• Bug – 2

Title: Liferay Forms – control missed for name and text length

Severity/Priority: High

Description:

Connect to web page <https://forms.liferay.com/web/forms/shared/-/form/122548>

When you digit name and/or text “why did you join the testing area“ with only 1 (one) character, you can unexpectedly apply Submit and data are sent.

Expected behaviour:

Name and text length must have a minimum number of 2 (two) chars.

Enviroment: Chrome broswer in PC Windows 10

Reproducibility Systematic.
